Professional Experience

Industry Experience.

Present	Co-founder, Witness Chain, US
	○ Witness Chain is a proof system for decentralized networks such as Helium, Pollen, and XNET. It provides proofs (or witnesses) of network performance, which are like decentralized speed tests or ping tests that work without requiring trusted servers and devices. It facilitates trustfree networking where any device with any radio can offer network to any user or enterprise.
Summer 2021	Research Intern, Kaleidoscope Blockchain, US
	○ Worked on building a tokenized telco marketplace, called kaleidoscope. It was designed to connect network applications with network infrastructures in a decentralized manner. We've built a demo where consumers can book network instances from the marketplace, and the blockchain ensures the payment and service according to the service-level agreement posted on chain.
Spring 2019	Research Intern, Urban Computing Group, SenseTime, China
	○ Worked on network architecture search.

Teaching Assistant.
